Utilizing voicemail on the AP

Explore Feature Bundling
for New Revenues!

**Get AP voicemail for ALL of your subscribers!
Pay for 30% - Get the rest FREE!**

Now you can offer your customers popular feature bundles that can give you bundles of profits in return!

A typical bundle includes:

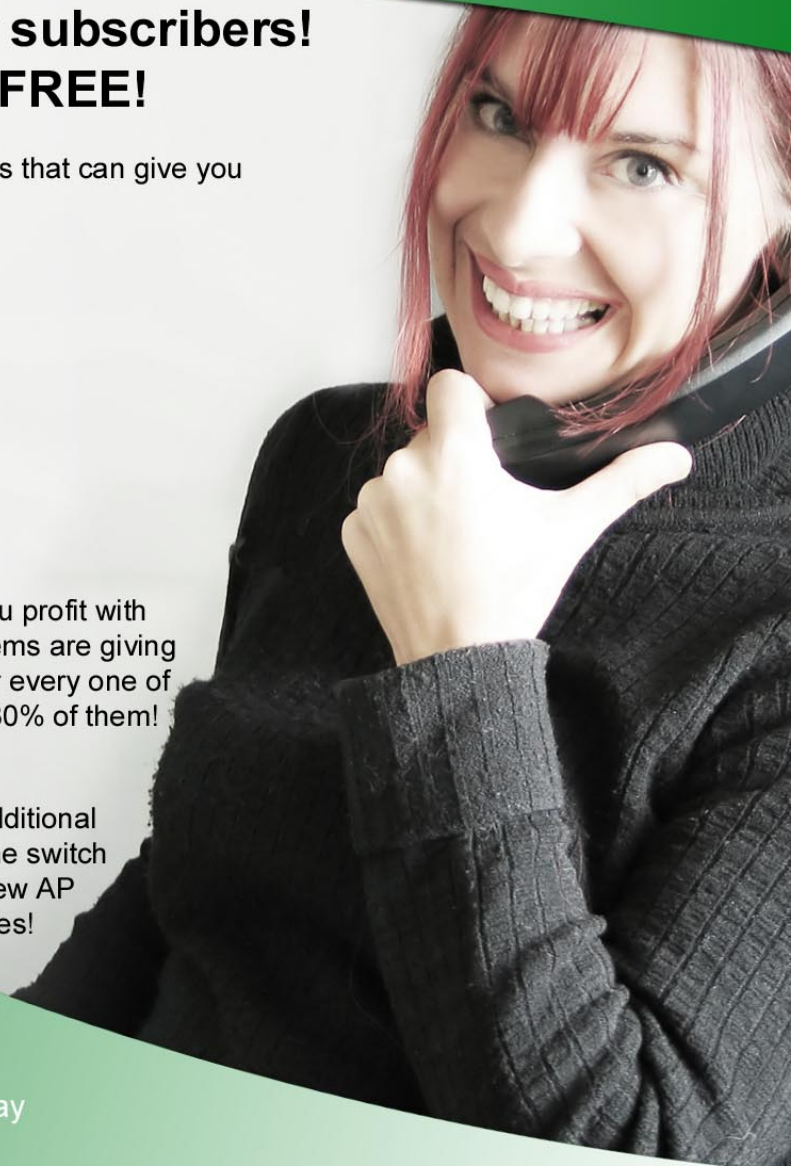

- VoiceMail
- Caller ID
- Call Waiting
- Call Return (*69)
- 3 Way Calling
- Call Tracing
- Call Forwarding
- ...and many more!

Use your existing switch-based features to help you profit with Feature Bundles, Siemens and Innovative Systems are giving you the chance to get voicemail licenses for every one of your subscribers, and you only pay for 30% of them! The rest are FREE!

Give away voicemail for free?

Some Telco's are giving away voicemail to all of their subscribers for free! Why? When an out of region call is terminated, an access fee is charged, creating revenue for the Telco. With voicemail, every call will be terminated! Your traffic mix may result in additional revenues if you actually gave away your voicemail to all of your subscribers!

Siemens will provide an additional discount of 40% off the switch interface with new AP purchases!

Call today for more information on the Application Peripheral and this Voicemail Promotion!
