

Next Generation Exchange powered by SURPASS Softswitch Technology

Grow Your Customer Base

Staying up at night wondering how you can grow your customer base and increase top line revenues in an era of declining wired lines and revenue?

We have the answer - Siemens Next Generation Exchange!

Next Generation technology is having a dramatic effect on current business models and revenue. The Siemens NGE offering, supports both TDM and packet voice services, and is a logical first step for carriers looking to make a circuit-to-packet transition - without costly infrastructure changes.

With the free information package and CD, learn how you can:

- Expand your customer base - Now!
- Improve your top line revenue with Siemens Next Generation Exchange
- Leverage your costly Network investment - Access and Outside plant
- Offer multiple applications on a single platform
- Dramatically reduce your costs
- Transition to NGN on your timetable and per your business model
